Factory

Safer Factory, Smarter Operations

AI-POWERED
VIDEO SURVEILLANCE
FOR INDUSTRY

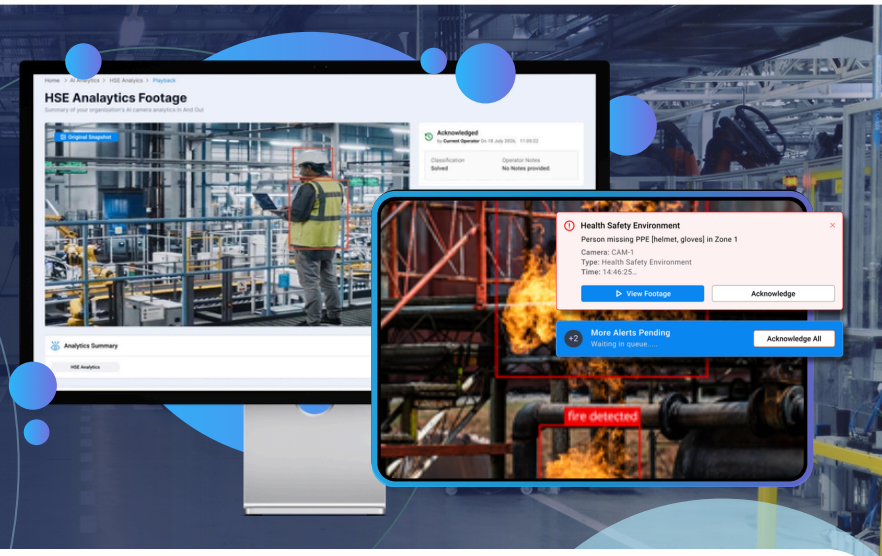

AI Solutions for Factory Safety and Security.

Helping detect potential hazards, area violations, and risky activities automatically through CCTV cameras.

Workplace Safety

Operational Efficiency

Faster Risk Response

PRODUCT FEATURES

HSE Analytics for Workplace Safety

Monitor PPE compliance, safe behavior, and potential risks in real time.

Restricted Area Detection

Detect and alert when unauthorized individuals enter restricted areas.

Suspicious Activity Detection

Identify individuals lingering in specific areas to help prevent potential threats.

Early Fire & Smoke Detection

Detect smoke and fire early for faster response and reduced losses.

Unattended Object Detection

Detect unattended objects left in factory areas to help prevent security risks.

KEY BENEFITS

Enhanced Workplace Safety

Reduce accidents and hazardous incidents.

Faster Response

Enable early warnings and timely action.

Operational Efficiency

Minimize downtime and production losses.

Regulatory Compliance

Support K3 standards and safety audits.

Data-Driven Decision Making

Gain accurate insights for safer operations.
