Oil & Gas

Safer Operations, Greater Efficiency

AI-POWERED
VIDEO SURVEILLANCE
FOR INDUSTRY

Smarter Monitoring for Safer Energy.

AI-driven video analytics that detect risks, improve operational safety, and keep your oil & gas operations running smoothly.

Safer Operations | Higher Efficiency | Better Decision Making

Built For the Challenges of Oil & Gas

USE CASE ANALYTICS

Surrounding Vessel Analytics

Monitor vessels and activities around your offshore and onshore assets to enhance situational awareness and prevent collisions.

Restricted Area Detection

Detect and alert when unauthorized personnel or vehicles enter restricted areas, ensuring asset and facility security.

HSE Analytics for Operations

Monitor PPE compliance, unsafe behavior, and potential hazards in real time to protect your people and assets.

Gas Tank Counting

Automatically count and monitor gas tanks in real time for better inventory management, asset tracking, and operational control.

Oil Leak Detection

Identify oil leaks early to prevent environmental damage, reduce response time, and minimize operational losses.

KEY BENEFITS

Enhanced Safety
Protect personnel and reduce workplace hazards.

Faster Incident Response
Detect incidents early and act immediately.

Operational Continuity
Minimize disruptions and maintain smooth operations.

Regulatory Compliance
Support safety standards and audit readiness.

Asset & Risk Visibility
Monitor risks and protect critical assets.
