Nayarta

Retail & Office

Smarter Spaces, Better Experiences

AI-POWERED VIDEO SURVEILLANCE FOR RETAIL & OFFICE

AI Security for Smarter Retail and Safer Offices.

From visitor management to behavioral analytics, Nayarta helps you create a safer, more efficient, and productive environment.

- Safe People & Assets
- Operational Efficiency
- Better Customer & Tenant Experience

Use Cases for Retail & Office

AI ANALYTICS SOLUTIONS

Visitor Management System

Manage guests and visitors easily and securely, from registration and identity verification to designated area access.

Person Heatmap for Queues

Monitor visitor density in real-time to optimize queue flow and enhance the customer experience.

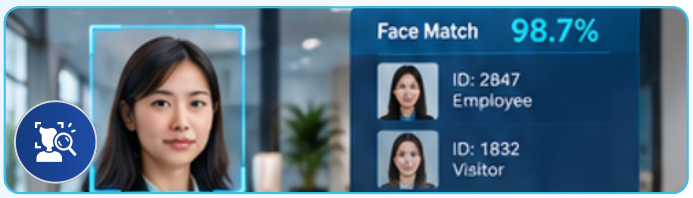

Loitering Activity Detection

Identify suspicious individuals or those lingering too long in specific areas to reduce potential risks.

Unattended Object Detection

Detect items left unattended in public areas, stores, or offices to prevent security threats.

Face Search And Tracking

Quickly search and track a person's face across all cameras for security, access verification, and visitor management.

KEY BENEFITS

Enhanced Safety

Prevent risks and protect assets as well as people.

Higher Productivity

Optimize operations and workflows.

Better Customer Experience

Create a better shopping and working environment.

Operational Efficiency

Reduce wait times and manual processes.

Data-Driven Insights

Make faster decisions with accurate data.
